

Grizzly Bear Survey Spring 2007 Cardston Elementary School

We wanted to find out peoples' opinions about grizzly bears. Our telephone survey was given to 75 residents of the Cardston County and surrounding areas. Here are the results of our survey. (Grade Six students at Cardston Elementary School)

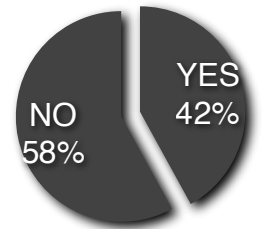

1. Do you think the number of grizzly bears are increasing in the wilderness areas of Cardston County and the Blood Reserve?

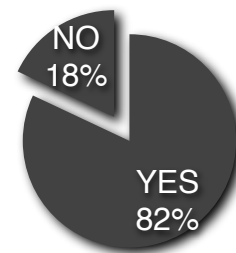

2. Have you seen any bears in these areas?

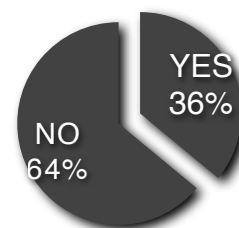

3. When spending time working, or having fun with friends or family in surrounding wilderness areas such as the community pasture, Police Lake, Lee Creek, St. Mary's River, etc. do you feel as safe from bears as you did five years ago?

4. Presently it is against the law to hunt grizzly bears in Alberta. If human-bear conflicts increase are you in favor of a limited bear hunt to control the population?

5. Are you in favor of spending more tax dollars to keep grizzly bears from becoming extinct?

6. Do you believe there should be wilderness areas especially set aside for grizzly bear habitat?
